

MUST DOS

1. Before doing any event, make sure the iPad is fully charged.
2. If you are using Halo App, make sure you create an online gallery prior to event.
3. Even though the offline upload queue will store images in a queue when not connected to a Wifi or Cellular signal, it is best practice to be connected to a strong Wifi or Hotspot while using Simple Booth. Why? The faster the users get their photos/gifs the better the experience.
4. Disc Storage...Make sure you have plenty of disc storage on the iPad...(someone fill in reason why here)
5. If you have images stored in the Queue **DO NOT DELETE APP** as the images will be lost.

RECOMMENDED INITIAL SETUP OF IPAD

1. Login to iPad.
2. Turn off Auto-Brightness
 1. Go to Settings
 2. Display and Brightness
 3. Turn off Auto Brightness
 4. Turn Brightness to High
 5. Turn Auto-Lock to Never
3. Turn on Guided Access (to lock app during usage of photo booth)
 1. Go to iPad Settings
 2. General
 3. Accessibility
 4. Scroll to Bottom and select Guided Access
 5. Turn on Guided Access and create passcode
4. How to Use App With Guided Access
 1. Download Simple Booth Halo from App Store
 2. Open Halo App
 3. Use Simple Booth login information to login to activate license
 4. Have user select the preset for the event that you have created hit arrow to move on to the settings.
 5. Hit Arrow Button Top right to get to the Tap To Start Screen
 6. Once at the Tap to Start Screen hit the Home Button Three Times Fast to Turn on Guided Access
 7. The Booth will run throughout the Event

**to turn off guided access after the event, hit the home button three times again...Select End in the Top Right and enter passcode.*
